Review Canadian Holidays in MS Project Calendar

Two to seven hours at US $100 per hour.

Please see this website: *MSProjectHolidayCalendars.com*

I have just published this website which has US and Canadian holidays for the years 2020-250, for insertion into Microsoft Project. I am not culturally familiar with the Canadian Holidays and I may have screwed up my interpretation of them. My source was the Wikipedia article *Public holidays in Canada - Wikipedia*

Requested Efforts

1. Review the website for clarity and effectiveness. Not a work-of-art, I just want it to serve its purpose.

2. Review the downloadable PDF "Motivation and Usage" (available via the action button) for clarity.

3. Review the monthly set of Canadian holidays in a PDF that I will send you, for accuracy. Have I named them properly? Included anything silly? Missed anything? Alsp spot-check some of the dates. Note that there are two versions of the calendar: strict and realistic.

4. Purchase the Canadian product for $10 and copy the two holiday calendars (strict and realistic) into MS Project. How was the purchasing experience? Inspect the list of holidays within MS Project which should be identical to the monthly PDF in #3 above.

5. Communicate your findings and feedback in an email or attachment.

Timing: The Microsoft Project User Group will publish an article by me about the calendars, at the end of July. So I'd like to fix any horrible mistakes before the website starts getting traffic.

You won't hurt my feelings if you find nothing wrong.
