

York University

Construction Project Manager

Reference: 105537

Duration: Full time

Location: 4700 Keele Street, Toronto

York is a leading international teaching and research university, and a driving force for positive change. Empowered by a welcoming and diverse community with a uniquely global perspective, we are preparing our students for their long-term careers and personal success. Together, we can make things right for our communities, our planet and our future. Facilities Services is a team of professionals who are committed to the delivery of support services that strive to enhance the quality of campus life for all students, faculty, staff, and visitors. We are responsible for providing a safe, clean, productive and well-maintained physical learning and working environment through the effective planning and delivery of professional services in design, construction, maintenance, utilities, caretaking and grounds. With a commitment to sustainability, equity, diversity and inclusion, Facilities Services works with campus partners to provide exceptional customer service and satisfaction in alignment with the University's core values. The Construction Project Manager is responsible for overseeing the effective administration of capital construction projects. The Construction Project Manager coordinates the day-to-day activities in the on-going process from pre-design services through design development, construction, commissioning, and close-out of Capital Building Projects while ensuring that elements of the client/user needs are incorporated into the design and construction of the project. The role also follows-up with issues and items daily ensuring the smooth flow of information and activities relating to the project. The Construction Project Manager acts as a project liaison officer and manages the client relationship. The position also oversees budget, management of procurement activities, and involves leading the multi/user/construction /project development process. The Construction Project Manager further supports York's commitment to sustainability, equity, diversity and inclusion.

To be considered for this opportunity, you will bring the following:

- Post-secondary degree in Engineering or Architecture. Professional license to practice Engineering or Architecture in Canada. Or equivalent experience and relevant education. Note: Position requires verification of degree(s)/credential(s). Minimum 7 years of experience in construction project development, including 4 years of management experience in the institutional facilities sector.
